With the rapid growth of Sino-European trade volume, Europe is becoming more and more important for **China Quality Certification Centre (CQC)** among the oversea markets. Nowadays the products kept renewing at a surprising rate and thanks for the dedicate working of our European cooperative partners, the number of CCC clients keeps growing.

Since the **China Compulsory Certification (CCC)** implemented in 2003, the China National standards upgraded frequently, and the certification rules for CCC also changed a lot. Especially, when the Order [2009] No.117 from the State Bureau of Quality Control Inspection and Quarantine (AQSIQ): **[Regulation Concerning Management of Compulsive Product Certification]** released on July. 3, 2009, the CCC certification rules were revised with significant changes accordingly.

In order to serve the European clients better, and to solve the technical problems in common for the CCC application, together with **China Certification & Inspection Group (Bremen GMBH and Marseille SARL)** and the Co-organizer **IMQ, TÜV Rheinland, VDE and UTAC**, **CQC** will hold a series of seminars in Europe from May, 17 to May, 24, 2010.

The seminars will be held in **Paris, Cologne, Offenbach and Milan**. The Paris/Cologne seminars focus on **Motor Vehicle and Components**, while the Offenbach/Milan seminars focus on **Electrical Appliance** (Low-Voltage appliance, Luminary, Household Appliance).

The lectures will be presented by CNCA officials and CQC specialists.

Please refer to the appendix pages for more details of the seminars.

Welcome to attend the CCC European Seminars in May, 2010!
