Instruction of China Compulsory Certification Mark Usage

(Telecommunication Terminal Equipments)

1. Use of CCC mark

The applicant shall strictly comply with the Management Requirements of Certification Mark for Compulsory Product Certification, which is the attachment of Announcement on China Compulsory Product Certification Mark Reform by CNCA (Announcement No. 10 of 2018).

2. Design of the mark allowed to use

It is allowed to adopt standard-size mark printed in a uniform manner or printed/ pressed mark.

3. Mark position and other special requirement

The mark shall be added on the outer surface of certified product (the main body or the nameplate). Using software annotation is also allowed. Software annotation is only applied to products with integrated display and the integrated display which is un-detachable. It should provide an operation manual for consumers and relevant regulatory authorities to quickly query the CCC mark in the accompanying documents, and the

product model should be listed in the manual. In addition, the product model shall be the same to content of CCC certificate. The product with electronic mark should be added the CCC mark on the minimum package.
