

Instruction of China Compulsory Certification Mark Usage

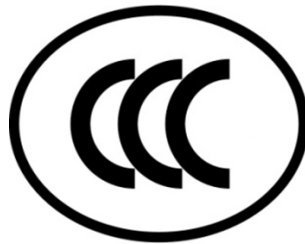

(Interior Trimming Material)

1. Use of CCC mark

The applicant shall strictly comply with the Management Requirements of Certification Mark for Compulsory Product Certification, which is the attachment of Announcement on China Compulsory Product Certification Mark Reform by CNCA (Announcement No. 10 of 2018).

2. Design of the mark allowed to use

It is allowed to adopt standard-size mark printed in a uniform manner or printed/ pressed mark.

It is allowed to adopt standard-size mark printed in a uniform manner for after-sales repair spare parts.

3. Mark position

The mark should be applied on the proper position of the main body of certified product or its minimum package. It is allowed to add the CCC mark on the back of the product body.

4. Other special requirement

In accordance with product and technique characteristics, printing/embossing mark can be completed at any phase of product formation.

Certification mark shall be persistent and clear/visible without damage of vehicle and certified products.
