

## Instruction of China Compulsory Certification Mark Usage

### (Safety Glass)

#### 1. Use of CCC mark

The applicant shall strictly comply with the Management Requirements of Certification Mark for Compulsory Product Certification, which is the attachment of Announcement on China Compulsory Product Certification Mark Reform by CNCA (Announcement No. 10 of 2018).

#### 2. Design of the mark allowed to use

The certification mark of safety glass used in automobiles and railway rolling stock should adopt pressing /screen printing/etching/sandblasting. The mark should be clear.

The certification mark of safety glass used in buildings can adopt standard mark printed in a uniform manner, and it is also allowed to adopt pressing /screen printing/etching/sandblasting permanent mark.

#### 3. Requirements for factory code

The factory code should be added on the proper position of certification mark, when using printed/pressed mark.

#### 4. Other special requirement

Some building glass is not suitable to use printing/pressing or standard mark, it is necessary to use mark in the minimum outer packing or accompanying document (such as the certificate).
