

## Instruction of China Compulsory Certification Mark Usage (Decoration Materials)

### 1. Use of CCC mark

The applicant shall strictly comply with the Management Requirements of Certification Mark for Compulsory Product Certification, which is the attachment of Announcement on China Compulsory Product Certification Mark Reform by CNCA (Announcement No. 10 of 2018).

### 2. Design of the mark allowed to use

It is allowed to adopt standard-size mark printed in a uniform manner or printed/ pressed mark.

### 3. Mark position and other special requirement

For products of solvent coatings for woodenware, the certification mark shall be added to minimum package on supporting sales (multiple components in one outer package). The main paint in the same package can be added to certification mark. If the products are not on supporting sales, the mark should be applied to the minimum package of main paint, moreover, the name, model, product name and using proportion of

diluents and curing agent also should be indicated in main paint's manual. The certification mark shall not be added to minimum package of diluents and curing agent. "Applicable for Interior Decoration" shall be marked under the certification mark.

For products of ceramic tiles, the certification mark shall be added to minimum sale package. "Radioactivity Level at Class A" or "Radioactivity Level at Class B" shall be added under the certification mark.
